The SofeTEK SC optical fiber connector is comprised of a polymer body and a ceramic ferrule/spring/crimp barrel assembly plus a crimp over sleeve and rubber boot. These connectors are suitable for, 900μm and 2 and 3mm cables. The connector is precision made and manufactured to demanding specifications. The combination of a ceramic ferrule and a precision polymer housing provides consistent long-term mechanical and optical performance.

SofeTEK has 15 years experience in manufacturing fiber optic connectors and cable assemblies. From Biconic and SMA through ST, SC to today’s Small Form Factor connectors like the LC, MU or MT-RJ. If you have a fiber network, no matter what the technology, SofeTEK can offer you a solution to your problem.
