USB TO IrDA CONVERTER

The USB to IrDA bridge adapter enables IrDA wireless data communication through a standard USB port. It supports SIR (2.4Kbps to 115.2Kbps), MIR (576Kbps to 1152Kbps) and FIR (4Mbps) modes. The effective data transmission distance is between 0 to 1M. This device is used to transfer data between any other IrDA enabled device.

**MODEL CODE**  **LENGTH**
BF-120  2M

**FEATURES**
- Easily enable IrDA function on the desktop PC through USB port
- USB Plug and Play convenience
- Fully compatible with IrDA 1.1 and USB 1.1 specification
- Compatible with FIR 4Mbps, MIR, SIR and ASK 56Kbps
- No external power required, low power consumption
- Warranty 1 year

**SYSTEM REQUIREMENTS**
- IBM compatible Pentium or higher
- Available USB port
- Windows 98 / 98se / Me / 2000 / XP

**USB 1.1 CONNECTIVITY**
