The C-DP-DVIDF is a high-speed signal converter, which supports Display port (DP) and Digital visual interface (DVI/F port).

It has a very low transfer delay of 450ps and channel deviation of less than 20ps.

The C-DP-DVIDF supports a transfer rate of 2Gbps.

**Display Port TO HDMI/M**

1. Signal transfer of Display port to DVI/F
2. 500MV Differential Signaling outputs
3. Data transfer rate: 2Gbps
4. Channel deviation is 20ps with transfer rate of 2Gbps.
5. Supports resolutions of up to 1920*1200/1080P
6. Operating temperature: -45degree celsius to +85degree celsius
