1. Introduction
The HDMI v1.3 Distribution Amplifier Series is the most advanced solution to HDMI signal distribution. Each product in this series is compatible with HDMI v1.3 specifications, a cutting-edge technology which defines the supports to transfer Deep Color (10-bit and 12-bit) video and new lossless compressed (Dolby TrueHD, Dolby Digital Plus and DTS-HD Master Audio) digital audio, with a high bandwidth up to 225MHz (6.75Gbps). Besides splitting and distributing, the HDMI v1.3 DA series also does signal amplification and equalization, so as to provide high performance I/O of audio and video.

2. Features
- HDMI 1.3, HDCP1.1 and DVI1.0 compliant Receiver.
- Deep color video up to 12bit, 1080p@(24/60)Hz.
- One HDMI source which connect up to two HDMI displays simultaneously.
- HDCP keysets allows each output to work independently when connecting to a HDMI display.
- Splits a HDMI source up to two outputs without signal loss.
- Supports DVI source and DVI display by using HDMI to/from DVI adaptor cable.
- Dolby Digital, DTS digital audio transmission (32-192 kHz Fs sample rate).
- Supports a wide range of PC and HDTV resolutions, from VGA to UXGA and 480i to 1080p.
- HDMI cable distance test with 1080p/8bits resolution the Input/Output distance can run up to 15/15 meters. with 1080p/12bits the Input/Output distance can run up to 10/15 meters.
- Supports EDID functionality. The unit will detect the first HDMI/DVI output source’s EDID and record in the unit. If the first detected output source is empty it will pass to next source, until the first HDMI/DVI been detected. When users reconnect all the output sources or re-plug the power source, the system will automatically recover the EDID.
- Supports xvYCC.
- Supports CEC bypass.
3. Operation Controls and Functions

Top Panel:

1. Sync LED: The LED will illuminate when the HDMI source signal is connected to the input.
2. Power LED indicator: The power LED will illuminate when power on.

3.2 Rear Panel:

1. HDMI Input: Connect input port to the HDMI or DVI output of your source equipment such as DVD player or set-top-box.
2. HDMI output 1 and 2: Connect each of the output ports to the HDMI display. When more than one output connected, the HDMI outputs play identical video signal simultaneously.
3. Power: Plug the 5V DC power supply into the splitter and connect the adaptor to AC wall outlet.
4. Connection and Installation
