Digital IP KVM Switches 8 & 16 Port

### Features
- 16 bit colour depth supports up to 65,536 colours
- Unique OSD feature to guide the user easily through the initial setup
- Multiple user accounts with individual preferences
- Firmware online upgradeable 24/7
- Custom certificate upload
- Flexible access sharing modes
- VNC screen encryption
- Internal firewall
- Supports industry-standard networking & management protocols such as TCP/IP and SNMP
- Offers secure management options including SSL encryption, SSH tunneling, and RADIUS authentication
- Platform independent - can be managed using any Java-enabled web browser
- One remote management point for multiple computers

#### Rack Mount Kits
- Supports UNIP08 BK
- Supports UNIP16 BK

#### Optional Slimline Cables

### Model Code
- UNIP08 BK: 8 PC (USB+PS/2) + IP
- UNIP16 BK: 16 PC (USB+PS/2) + IP
- SS-01: 2x RJ-14 connectors and 1x DB-9 female connector

USB / VGA 1.8M Cables Included

Digital IP KVM Switch 4 Port

#### Model Code
- FIPS04: 4 PC (USB+PS/2) Digital KVM

USB / VGA 1.8M Cables Included

#### Optional Slimline Cables

The FIPS04 Digital KVM via IP allows network administrators to control and monitor servers from anywhere in the world over the Internet. It also allows BIOS level remote control of a target server or servers connected to a KVM switch over a TCP/IP network. Administrators can control, reset and reboot servers from a remote location and even watch the entire boot process remotely. It offers unique USB capability and the ability to transfer files to the server from a remote location. Remote CD-ROM emulation allows you to install or update your server’s Operating System via an internet connection. This unit is controlled from any web browser, eliminating the need for proprietary client access software. It is compatible with most existing KVM switches and provides full cross platform and multiple operating system support.

#### Features
- USB console
- Data Transfer
- RoHS compliant
- 16 bit colour depth supports up to 65,536 colours
- Different user accounts may have different preferences
- Firmware online upgradable 24/7
- Custom certificate upload
- Flexible access sharing modes
- VNC screen encryption
- Internal firewall
- Unique OSD feature to guide the user easily through the initial setup
- Supports industry-standard networking and management protocols such as TCP/IP and SNMP
- Offers secure management options including SSL encryption, SSH tunneling and RADIUS authentication
- Platform independent - can be managed using any Java-enabled Web browser
- One remote management point for multiple computers
