2016 NEW PRODUCT RELEASE

LS7200 3D Soundbar System

The LS7200’s low-profile form contains a multi-driver array fed by a slim external amp connected via a single cable, reproducing Dolby Atmos® and DTS:X™ soundtracks with conviction. Effects move from channel to channel, immersing you in multidimensional sound, while music streamed via Chromecast built-in*, AirPlay, or DTS Play-Fi® over Wi-Fi® has substance that others can’t match. Players connect to the receiver’s four HDMI® inputs, and wiring is concealed for a near-invisible install. With a vast choice of entertainment within Onkyo Controller app (including multi-room audio), the LS7200 makes life better with sound tailored to you.

* Enabled with a firmware update. ** Enabled with a future firmware update.

HT-L05 5-Channel Network Receiver
- Dolby Atmos® and DTS:X™ Object-based Audio Playback for an Immersive Multidimensional Listening Experience
- Discrete Dialog Control Technology for DTS:X
- DTS Neural:X™ Upmixing for Standard Multichannel Audio Formats
- New Surround Enhancer Mode Based on Dolby® Technology
- Dual-band 5 GHz/2.4 GHz Wi-Fi for Stable Network Connection
- Ready for Onkyo Controller App*1 Integrated Multi-room Intuitive Operation
- Features Chromecast built-in*2 Wireless Audio Streaming Platform
- DTS Play-Fi® Shares Music from Apps to Receiver and Wireless Speakers
- AirPlay Audio Streaming from iTunes and iPad, iPhone, and iPod touch
- Supports Spotify®, TIDAL, TuneIn, Pandora®, and Deezer Services**
- Bluetooth® Wireless Streaming Technology (Version 4.1+LE)
- 5-Channel Digital Amplification System for Powerful AV Performance (4 x 1 kWh, 1% THD, 1 Channel Driven, IEC)
- 4 HDMI® Inputs / 1 Output (with ARC/CEC Multlink Control) Supporting 4K/60p, HDCP 2.2, HDR10, and BT.2020
- AccuEQ Room Acoustic Calibration for Balanced Soundfield (Setup Mic Included)
- FireConnect™ Wireless Multi-room Capability
- DSD Decoding*6 (2.1-Channel/5.6 MHz, Multichannel 2.8 MHz) via Network, HDMI, and USB
- Assignable Digital Audio Input (Optical) and Analog RCA Input
- 1080p Video Upscaling to 4K Resolution
- FM Tuner with 40-Station Memory Preset
- USB Type-A Input for USB Memory Audio Playback
- A/V Sync Function (-100 to 500 ms at 48 kHz in 5 ms Steps)
- Multiple Listening Enhancement Modes to Suit Content
- CinemaFILTER™ Audio Mode

LB-403 Soundbar System
- Ultra-low-profile Design for Unobstructed Vision
- Dual-driver System for L/R Channels, Dual Center Drivers, and Discrete Height Speakers Enabling Object-based Surround-Sound
- Multichannel Audio Cable for Soundbar Connection
- Solid Build Quality, Chic Style, and Excellent Finish

SLW-403 Wireless Powered Subwoofer
- Powered Bass Reflex Design
- Rated Output Power: 50 W (4 Ω, 100 Hz, 1%, IEC)
- 16 cm Cone Woofer
- Sculpted Feet, and Quality Finish

*1 For iOS and Android™ devices. Please check App Store or Google Play™ for device and OS requirements. *2 Enabled with a firmware update. *3 Enabled with a future firmware update. *4 Service availability may vary with region. Pandora is available in Australia and New Zealand only. Please confirm before purchase. Subscription may also be required. *5 FireConnect™ is a technology based on Blackfire provided by Blackfire Research Corp., USA. Sampling rates of 44.1 kHz and 48 kHz are supported. Sharing audio from external analog inputs depends on the model and is enabled with a future firmware update. *6 DSD not supported over wireless LAN.
Clean and Simple Connection
How do we send five audio channels to the soundbar without a tangle of wires? Simple: signals pass through a pin-type Multichannel Audio Cable. Plug your players into the receiver, link to the TV with a single HDMI®, and let simplified installation enhance sound with a cleaner look.

FireConnect® Wireless Multi-room Audio
FireConnect® mirrors network audio and external analog sources connected to master component—from streaming services to vinyl records—on FireConnect®-compatible speakers in other rooms. Music selection, speaker grouping, and playback management across the home are built into Onkyo Controller app for iOS and Android®.

Stream Anything with DTS Play-Fi®
DTS Play-Fi® is a protocol that works with any audio app on mobiles and PC. Need whatever’s playing to the soundbar, even different sources to different components at the same time. Note: DTS Play-Fi® requires a firmware update.

Life’s Easy with Onkyo Controller
Our free app collects next-gen network functionalities, including streaming services and network audio, into an intuitive control interface. Perform general operations or send music to compatible speakers from your phone.

Internet Radio and On-demand Streaming
TIDAL, Deezer, TuneIn, and Pandora® are baked into the GUI, which makes it super easy to select music using Onkyo Controller or the included remote. Spotify® subscribers can also cast direct from Spotify app to soundbar. Note: FireConnect® is enabled with a firmware update. Streaming audio from external clients depends on the model and is enabled with a future firmware update. Sampling rates of 44.1 kHz and 48 kHz are supported. FireConnect® is a technology based on Blackfire provided by Blackfire Research Corp., USA.

AccuEQ Room Acoustic Calibration
In moments, AccuEQ measures and analyzes sound output from your speakers and performs corrections for beautifully clear and cohesive object audio in your listening space.

Powerful Amps for Moving Sound
The receiver’s slim form contains an efficient digital amplification system with independent power supply to deliver loads of clean power to the soundbar. Wireless sub has its own 50 W amp for deep LFE in movies and games.

Multi-Driver Soundbar System
Pairs of drivers are featured on the left, right, and center channels, while separate woofers reproduce height effect channels. Despite a slim profile of only 53 mm, the multi-driver system delivers confident and cinematic sound with a clear view of the screen.

* Excluding protruding parts.
