- KNVU-3: USB, 3M
- KNVU-6: USB, 6M

Control 4, 8 or 16 Computers from a single Keyboard, PS/2 Mouse and VGA Monitor

The Slim UNV series NovaView KVM Switches are ideal for managing multiple computers in server rooms where space is at a premium. On Screen Display (OSD) features computer naming, computer selection, status indication, auto scan and much more. Up to 136 servers can be easily managed by cascading multiple KVM switches to expand the capacity. Revolutionised video enhancement technology ensures superb quality up to 1920 x 1440. For secured connection and space saving, these KVM switches require just one HD DB15 VGA connector for each computer connection.

**FEATURES**

- Cascade configuration expands system capability
- 1U-height form factor saves rack space
- Unique cables for secured connection
- Auto-scan function automatically selects computer sequentially
- Supports Microsoft IntelliMouse (Pro)
- Assigns computers with unique and meaningful names
- Identifies and selects computers by the name
- Programmable scan filters unused computers
- Stores system settings and name entries to non-volatile memory
- Password security locks computer from unauthorised access
- Gains complete control with easy-to-use OSD interface
- Hotkey functions allow easy computer access
- Keyboard states automatically saved and restored when switching computers
- Operating system independent and transparent to all applications
- Plug and play system configuration
- Keyboard and mouse can be hot plugged at any time
- DDC2B compatible
- Optional multimedia module supports microphones and stereo speakers
