The combination of Integra console and Integra KVM Switch Module offers the latest and the most efficient way of controlling server rooms and multiple computers. Many models of Integra KVM Switch Modules are available to control between 4 and 136 servers via the Integra console or another set of consoles 100ft (30m) away; this is the ultimate tool for server management.

With a universal C-36 connector, any module can slide into the back of the TFT LCD console drawer. The module is securely locked into the drawer as an integral part of the 4-in-1 system; keyboard, touchpad, monitor and KVM switch. Keyboard mapping enables you to operate a combination of PC, Mac and Sun servers.

**Features**

- Cascade configuration expands system capability
- Auto-scan automatically selects computers sequentially
- Supports Microsoft IntelliMouse (Pro)
- Supports both PS/2 and serial mouse
- Assigns individual computers with unique and meaningful names
- Identifies and selects computers by the names
- Programmable scan filters unused computers
- Stores system settings and name entries to non-volatile memory
- Password security locks computer from unauthorized access
- Gains complete control with easy-to-use OSD interface
- Hotkey functions allow easy computer access
- Keyboard states automatically saved and restored when switching computers
- Operating system independent, transparent to all applications
- Plug-and-play system configuration
- DDC2B compatible
- Supports optional multimedia module for microphones and stereo speakers
- Cascadable to all 19 rack mountable PS/2 KVM Switches
- Special 3-in-1 cables save spaces and offer the most flexibility
- 16-port model is only 1U in height
