**SMC2555W-AG2**

**EliteConnect™ Universal 2.4GHz/5GHz Wireless Access Point**

Wireless LAN security is a main concern in enterprise deployment. The EliteConnect™ Universal 2.4GHz/5GHz Wireless Access Point provides enterprise level advanced authentication and encryption security features. Security features include the new Wi-Fi Protected Access (WPA and WPA2), up to 152-bit WEP encryption, AES, 802.1x authentication access control with key rotation (MD5, EAP-TLS per user per session key, EAP-TTLS per user per session key, session key and broadcast key rotation, and PEAP), support for FUNK Odyssey and Microsoft RADIUS Server, up to 1024 MAC address authentication, disabled SSID broadcast, and up to 64 virtual LANs (VLANs) through 802.1x.

The new SMC2555W-AG2 also has flexible management features. Web-based network management tools make configuration and remote management of the network simple. IT professionals can also use Command Line Interface (CLI) to quickly and easily manage the device, along with telnet and SSH. In addition, SMC Networks EliteView Management Software and SNMP (v1, 2c, 3) support in SMC2555W-AG2 allows easy integration of your wireless LAN with your wired infrastructure. Other management features include Syslog and Event Logging.

If extended range is required, users can choose among the wide selection of SMC 2.4GHz/5GHz High Gain Antennas. SMC2555W-AG2 comes with detachable antennas with R-SMA connectors for optional 2.4GHz and 5GHz High Gain Antennas for extended range and coverage. The new enterprise level 802.11a/b/g Wireless Access Point supports Power over Ethernet that adheres to 802.3af standard. Power over Ethernet support reduces installation cost by using standard Category 5 cable to provide power to the Access Point. In addition, SMC2555W-AG2 provides an anti-theft mechanism by integrating a Kensington security slot on the device. All of the above make SMC2555W-AG2 a perfect solution with unparalleled flexibility and investment protection for your wireless LAN deployment.
