SMC7904WBRA4
4-Port Wireless Annex A ADSL2/2+ Modem Router

Product Overview

SMC7904WBRA4 is a highly integrated residential broadband access device which combines the function of ADSL modem, wireless G access point and 4-ports Ethernet router. SMC7904WBRA4 is fully compliant with the latest ADSL2/2+ and Ethernet standards like IEEE802.3/802.3u. It is also TR-067 compliant, ensuring the interoperability with your ISP’s network infrastructure. SMC7904WBRA4 provides high performance applications, access to the Internet, downstream up to 24Mbps and upstream up to 2Mbps, for individual users, SOHOs, and small enterprises.

Key Features and Benefits

Enhanced ADSL2+ Technology
Instant always on Internet connectivity for wired computers. The built-in ADSL2/2+ modem gives unrivaled asymmetric high-speed data transfer rates with up to 24Mbps downstream.

Robust Security and Firewall Protection from Hackers
The NAT firewall with Stateful Packet Inspection (SPI), Intrusion Detection System & Denial-of-Service provides robust security from hackers while VPN pass-through allows secure connectivity to your office or corporate network. Access Control Lists with URL blocking allow you to control access to Internet services & filter inappropriate web sites.

Quality of Service (QoS)
The SMC7904WBRA4 includes a build in QoS engine, which allow network administrators to allocate network resource and to prioritize real-time applications like voice & video, to enable smooth Internet phone (VoIP) and lag-free online gaming. WMM (WiFi Multimedia) delivers QoS to the wireless network, while IP QoS prioritizes outbound internet traffic.
