The power of up to 24Gbps in a 1RU box!

The TigerSwitch 10/100/1000 brings you the power of 24Gbps in a rack mountable 1RU footprint. Without rewiring your Ethernet network, SMC8612T offers twelve auto-MDIX tri-speed ports over a feature-rich platform for bandwidth-starved networks. Features onboard this small but robust switch include: security authentication with RADIUS or SSH, complete QoS for today’s multimedia applications featuring VLANs with GVRP and IGMP snooping, jumbo frame of up to 9K support, and standard management tools such as SNMP, RMON, and Spanning-Tree.

The TigerSwitch 10/100/1000 is ideal for environment that requires power applications or gradual network migration toward gigabit. This TigerSwitch is perfect for bandwidth hungry wiring closet.
