SMC introduces the latest gigabit to the desktop products, EZ Switch 10/100/1000 - GS16 and GS24. These switches provide gigabit Ethernet connectivity from the network backbone all the way to the edge of the network and to individual desktops.

Up to 10 times the speed of 100Mbit networks, these switches reduces transfer times of large data files or bandwidth intensive applications and enhancing overall network significantly, making these switches worthy investment in the long run.

The SMC EZ Switches are easy to install and an ideal solution for network migration, as they are equipped with 10/100/1000 auto-MDIX ports. Not only is each port tri-speed, all ports can be either connected to a workstation or another switch.

Providing non-blocking wire-speed throughput, the EZ Switches can handle the growing performance needs in imaging, animation, CAD, film production and many more current and emerging application. They deliver scalable solutions for increased performance and productivity.
