SMCWBR14S-N4
Barricade™ N 150Mbps Wireless 4-port Broadband Router

OVERVIEW
The Barricade™ N 150Mbps Wireless Broadband Router (SMCWBR14S-N4) is the perfect all-in-one networking solution for connecting and sharing your high speed cable/xDSL internet connection. Designed for the home, this platform independent multi-functional router combines a 4-port 10/100 LAN switch, 150Mbps Wireless-N access point, NAT firewall with Stateful Packet Inspection (SPI) and User friendly web-based management interface in one convenient device.

SMCWBR14S-N4 provides better performance than existing 802.11g technology and is fully backwards compatible with existing 802.11b/g products. It supports the latest WPA and WPA2 wireless encryption standards, which prevent unauthorized access to wireless networks and ensure data is secure. Wireless security can also be set up easily using Wi-Fi Protected Setup™ (WPS) that enables push button (PBC) or PIN configuration.

The integrated NAT firewall with SPI provides protection from hackers and Denial of Service attacks by analyzing individual data packets, to ensure that only authorized packets are allowed access to the network. Using the Access Control feature parents or network administrators can block certain websites, limit web access based on time or dates, and/or block internet access for applications like P2P utilities or games. Finally, configuration of your internet connection and advanced router functions is made simple and straightforward with the EZ™ Installation Wizard and intuitive web-based management interface.

KEY FEATURES
Share your high speed cable/xDSL internet connection
Simply connect your cable or xDSL modem with Ethernet connection to the 10/100 WAN port for instant always on internet.

4-port 10/100 LAN switch with auto MDI-MDIX
Directly connect four computers or expand your network by connecting additional switches. Auto MDI-MDIX means you do not need to worry about cross-over cables.

WPA/WPA2 Encryption
Prevents unauthorized access to your wireless network and ensures your data is secure.

Built-in Wireless-N 150Mbp access point
Provides better performance and coverage than existing 802.11g technology.

NAT firewall with Stateful Packet Inspection (SPI)
Provides protection from hackers and Denial of Service attacks by analyzing individual data packets, to ensure that only authorized packets are allowed access to your network.

Wi-Fi Protected Setup™ (WPS)
Makes wireless security setup easy with push button and PIN configuration methods.

Web-Based management interface
Simple and straightforward set-up with the intuitive web-based management interface and EZ™ Installation Wizard.
