Stop guessing about circuit breaker tripping issues! For the first time, you can detect the type of fault and locate the position of an electrical “event” that causes intermittent or persistent circuit breaker trips and No Fault Found (NFF) conditions, thus giving you the critical information needed to reduce call backs for circuit breaker trips.

The Fault Trapper is a new class of tester using Spread Spectrum Time Domain Reflectometry (SSTDR) to monitor live circuits. Running on in-line power for extended battery life, it captures time and distance to Opens, Shorts and Arc Faults saving the event information in memory for later investigation. The in-line 40 Amp Module isolates the circuit being monitored from the breaker panel and all other breakers. The last faults can be viewed off-line using the back-up battery.

Fault Trapper allows unattended monitoring of energized dedicated circuits for NFF conditions. Just set it up, press the Test button to begin monitoring and walk away. Come back later or the next day to find out the why-when-and-where’s of circuit breaker trips and NFF conditions.

- In-line monitoring of energized dedicated circuits up to 300 VAC and 40 amps
- Allows unattended monitoring of intermittent or sustained electrical events
- No Splicing – Plug in with existing wiring
- Identifies opens, shorts and arc faults
- Detects the last event whether or not the breaker trips
- Runs on in-line power in monitor mode
- Fault location reported as distance from the Fault Trapper in feet/meters
- Easy-to-use three-button operation
- Backlit LCD display for dark areas
- Back-up battery allows capture of breaker trips/unpowered display of results

Specifications

**Physical Dimensions**
- **Fault Trapper Meter (Main Unit)**
  - Size: 15.25 x 7.6 x 3.8 cm (6.0 x 3.0 x 1.5 inches)
  - Weight: 255 grams (9 oz.) With battery
- **In-Line 40 Amp Module**
  - Size: 11.5 x 7.6 x 5.85 cm (4.5 x 3.0 x 2.3 inches)
  - Weight: 312 grams (11 oz.)

**Input Rating**
- **Fault Trapper Meter (Main Unit)**
  - 90 to 265 Volts AC RMS 50/60Hz, 4 Watts max.
- **In-Line 40 Amp Module**
  - 300 Volts AC RMS, 40 Amp circuits maximum
  - supplies power to main unit

**Measurement**
- Method: Spread Spectrum Time Domain Reflectometry (SSTDR)
- Accuracy: +/- 10% of the reading
- Maximum Length: 300 ft on NM-B or Wire in Conduit

**Battery Use and Life**
- Used to view results when not AC powered
- Battery Low Level: Approximately 5.5 volts
- Battery Life (9 Volt alkaline battery, typical)
  - Standby Mode (Non-viewing): 2 years
  - Active Viewing Mode: 4 hours typical

**Environmental Temperature**
- Operating: 0 to 50°C (32 to 122°F)
- Storage temperature: -20 to 60°C (-4 to 140°F)
- Long Term Storage w/ battery:
  - 35°C maximum (95°F)
- Humidity: 10% to 90%, non-condensing
- Altitude: 2,000 meters (6,561ft) maximum

**Rating**
- 300V CAT III, 120/240Vac, 40 amps or less, single phase.

**Safety Compliance**
- TÜV-tested to UL 61010-1:2012, CAN/CSA-C22.2 No. 61010-1-12

**Warranty**
- 1 year
